AUTHOR	Nelson, Frank, Comp.
TITLE	1998 Idaho Public Library Statistics and Library Directory. A Compilation of Input and Output Measures and Other Statistics in Reference to Idaho's Public Libraries, Covering the Period October 1, 1997 to September 30, 1998.
INSTITUTION	Idaho State Library, Boise.
PUB DATE	1999-08-00
NOTE	209p.
PUB TYPE	Numerical/Quantitative Data (110) -- Reference Materials - Directories/Catalogs (132)
EDRS PRICE	MF01/PC09 Plus Postage.
DESCRIPTORS	Graphs; *Library Services; *Library Statistics; *Public Libraries; Tables (Data)
IDENTIFIERS	*Idaho; Output Measures for Public Libraries; *Performance Measures for Public Libraries

ABSTRACT

This report is a compilation of input and output measures and other statistics in reference to Idaho's public libraries, covering the period from October 1997 through September 1998. The introductory sections include notes on the statistics, definitions of performance measures, Idaho public library rankings for fiscal year 1996, and a state map showing the locations of Idaho public libraries. The statistical data are divided into three tables: (1) libraries by county, including data on population, registered borrowers, facilities, staff, directors, operating income, operating expenditures, collections, hours and use of the library, circulation, and interlibrary loans; (2) libraries by population served, including the same data elements as the first table; and (3) public libraries by name with city, county, NUC (National Union Catalog) symbol, foundation, friends, audits, and long range plan years. Four graphs provide 1994-98 data on population, attendance, circulation, and expenditures, and a public library statewide summary for 1994-98 is included. The final section of the document is an Idaho public library directory. (MES)

Hours and Use of the Library
Circulation
Interlibrary Loans

[The data elements for each group are arranged in the same order as the data in Table 1 above. The only difference is that the data are arranged in descending order by the size of population service area, not by county.]

Table 3. Public Libraries by Name with City, County, NUC, Foundation, Friends, Audits, and Long Range Plan Years 87-89

Statewide Summary 1994-98 Plus Miscellaneous Graphs 90-94

INTRODUCTION

The 1998 edition of the Idaho Public Library Statistics includes data gathered by the State Library with the "Public and District Library Annual Statistical Report Form." That report reflects:

1. All monies available to a library during the report year, regardless of the source of funds;

2. All expenditures made by the library, regardless of the source of funds;

3. Populations served within legal service areas and also by contract; and

4. Collections, services, and staff provided during the report year.

The Report Form complies with the Federal/State Cooperative System for Public Library Data (FSCS).

In addition to the actual data reported, a number of performance measures have been calculated for each library. Selected per capita and percentage figures have been generated by computer and are presented in columns next to the data (numerators) from which these measures were derived.

It is important to remember that performance measures and comparative statistics are not absolutes. There are no right or wrong measures and no single measure tells a complete story. An individual library's statistics should be considered in the context of its roles, goals, and objectives. Be creative in thinking about how the information contained in these numbers can help you improve library services. Use them to analyze your services and to work with your local government and your public.

Additional information on the use of statistics may be found in the American Library Association's Planning and Role Setting for Public Libraries (Chicago: ALA, 1987) and Output Measures for Public Libraries (Chicago: ALA, 1987). Assistance in analyzing the statistics and performance measures is available from the State Library Development Division.

NOTES ON THE STATISTICS

A. Locating Data and Performance Measures for Your Library

DATA BY COUNTY [Table 1]
In Table 1, data for all reporting libraries are listed alphabetically by county and then by library name under each of 11 categories: Population, Borrowers, Facilities, Staff, Directors, Operating Income, Operating Expenditures, Collection, Hours and Use of the Library, Circulation, and Interlibrary Loans.

DATA BY SIZE OF POPULATION SERVED [Table 2]
In Table 2, all data elements are listed in descending order by TOTAL OR COMBINED POPULATION SERVED, which is defined as: "The population of a library's legal service area (within boundaries of a city or a district) PLUS the population of any other areas served by contract." Libraries are grouped as follows:

Group 1 - Population more than 10,000
Group 2 - Population from 5,001 to 10,000
Group 3 - Population from 2,501 to 5,000
Group 4 - Population from 1,001 to 2,500
Group 5 - Population less than 1,000

Group averages [means] and medians have been calculated for each group.

B. Reporting Libraries

At the end of FY 1998 there were 107 publicly funded library entities in Idaho. This year a total of 105 libraries submitted data for publication. The 2 nonreporting libraries are listed below together with the letter code designating type of library:

Ola District	D
Prairie District	D

Library Type Codes and Number of Each Type of Library

D=District	44
C=City	48
M=Multi Jurisdictional [C & D]	7
A=Administrative Only	4
S=School/Community	4
Publicly Funded	107

C. Contracting Libraries

Many libraries in Idaho are party to some type of contract to provide services to other libraries or to receive services from other libraries.

Four libraries are districts which contracted during 1998 to have all services provided to their patrons by other libraries. These four contracting districts have legally established boards and levy taxes, but have no facilities, collections, or other services. These libraries are included in the data tables. They report Population, Funding and Expenditures, but other data and measures are reported as zero. Services provided to their patrons are included in the numbers reported by the libraries with which they contract. The four districts are:

Blackfoot Rural District
Bonneville County District
Franklin County District
Fremont County District

Also, Contract Income and Expenditure amounts are deducted from State Total Operating Income (p. 27) and State Total Operating Expenditures (p. 33) to correct for doubling error. See page 4.

D. Accuracy of the Statistics

The data in all tables are as they were reported by the local library to the State Library except where obvious inconsistencies were spotted. In most cases, revised figures were provided by the local library.

POPULATION

Population figures have been adjusted to reflect the most recent estimates (7/1/98) published by the Bureau of the Census on March 12, 1999. Service populations for city libraries and county wide districts are as reported by the Bureau of the Census. Also, partial county district populations have been adjusted in counties where it is possible to calculate the population by subtracting the populations of cities with tax supported libraries. There are, however, several districts where other methods for estimating population must still be used, since their boundaries do not match Census "block" units.

In an effort to get the most correct population figures for Ada County, information has been gathered from both the Census Bureau and the Ada County Planning Association. Traffic Analysis Zones [TAZ] maps, created by the latter, were used to calculate some populations.

The total population for Idaho as of 7/1/98 was **1,228,684**. This is an increase of **221,950** over the 1990 Census figure of **1,006,734**.

TOTALS, MEANS, MEDIANS, PERCENTILES, ETC.

County Totals and Means (averages) are computed in Table 1. Please note that the County Means are computed from the County Totals and not by averaging figures for all libraries within the county.

While all State Means are calculated from bottom line figures there are differences in the way they are calculated, depending on the data type. For example Means for "raw data elements" such as "Annual Circulation" or "Central Libraries" may be calculated by dividing the State Totals by the number of reporting libraries. However, State per Capitas and Percentages are calculated from State Totals and not by "averaging the averages." For example, the State Mean for "Circulation per Capita" is figured by dividing the State Total for "Annual Circulation" by the State Total for "Combined Population Served."

In Table 1, Percentiles [25%, 50% or the Median, and 75%], have been added to the summary section. Of these measures, the Median is probably the most useful. As an "average", the Median is much less sensitive to extreme differences than is the Mean. Remember that the median is defined as the "exact middle" figure. To derive the median, each column of figures is arranged in descending order and then divided in half. For columns having an odd number of entries, the median is an actually reported figure. For columns having an even number of entries, the median is calculated by dividing the sum of the two middle figures by 2.

In Table 2, Means and Medians are calculated for each group [1 -5].

DOUBLING ERRORS

An attempt has been made to correct a "doubling" error which occurs at the bottom line, especially in columns containing data on Population, Funding, and Expenditures. If not corrected, figures for a contracting library may be counted twice, once on its own line, and once again on the providing library's line. In the population tables, the column for Contract Population will sometimes show both plus and minus figures. This allows the reporting of more accurate population data across the page and keeps the "doubling" effect from occurring when totals are added down the page. Figures which are subject to doubling effects are enclosed in boxes.

In the "Total Income" and "Total Operating Expenditures" columns the doubling error has been corrected manually on county subtotal lines and again at the bottom line. Items which have been so corrected, are again placed in boxes.

MULTI COUNTY DISTRICTS

There are four library districts in Idaho whose boundaries cross county lines. For these libraries, all data and measures are listed under the county wherein the central library is situated. MULTI COUNTY libraries are marked with an "@" symbol. The four MULTI COUNTY libraries are: Kuna School/Community [Ada-Canyon], Lizard Butte District [Owyhee-Canyon], Sugar-Salem School/Community [Madison-Fremont], and Prairie-River District [Nez Perce-Lewis-Idaho].

DEFINITIONS OF PERFORMANCE MEASURES

This section defines the various measures which are calculated and presented throughout the data tables.

Combined Population Served Legal Population + Contract Population	A library's COMBINED POPULATION SERVED is used as the divisor in calculating all "per capita" measures. The number of nonresident borrowers is not included, except in one "percentage" calculation given below.
Percent COMBINED Registered Borrowers Combined Registered Borrowers / Combined Population x 100(%)	
Acquisition Rate [Percentage] Items Added / Total Items Held x 100(%)	This input measure relates the number of new acquisitions to the overall size of the collection. It is the number of titles acquired during the year divided by the number of items held by the library (including the new ones). This measure is expressed as a percentage [4%].
Turnover Rate [Ratio] Annual Circulation / Total Items Held	This output measure is a ratio that relates the number of items circulated to the overall size of the collection. It is the total circulation divided by the number of items held in the collection at the end of the year. The measure indicates the average number of times each item in the collection was circulated, assuming that circulation was evenly distributed among the library's holdings.
Volumes per Capita Total Items Held / Combined Population	This input measure relates the number of items (print and nonprint) in the library's collection to the number of persons in the library's combined service area.
Circulation per Hours Open Annual Circulation / Annual Hours Open Duplicated	This output measure relates the number of materials from the local collection circulated to the number of hours the library is open. It is the total circulation divided by the number of hours the library is open during a year. The measure indicates the average number of items checked out each hour the library was open, assuming that circulation was evenly distributed throughout the year. [Duplicated hours includes main and all branch library hours.]
Circulation per Capita Annual Circulation / Combined Population	This output measure relates the number of items circulated to the number of persons in the library's combined service area. It is the annual circulation divided by the combined population served.

ILL Net Lending Rate ILLs Loaned ILLs Borrowed	This output measure relates the number of materials provided to other libraries through interlibrary loan to the number of materials borrowed from other libraries through interlibrary loan. It is the number of items loaned divided by the number of items borrowed. As a simple ratio, the measure indicates whether the library does more borrowing or more lending. A number greater than 1.0 indicates the library does more lending; a number below 1.0 indicates the library does more borrowing.
ILLs per 1,000 Circulation ILLs Borrowed x 1,000 Annual Circulation	This output measure relates the number of materials borrowed from other libraries to the number of materials from the local collection circulated to borrowers. It is the number of materials borrowed from other libraries through interlibrary loan divided by total circulation multiplied by 1,000.
Visits per Capita [annual] Annual Visits Combined Population	This measure relates the number of visits made to the library to the number of persons in the library's combined service area. It is attendance at the library during the year divided by the combined population served by the library. The measure reflects actual visits to the library.
Reference per Capita Annual Reference Combined Population	This output measure relates the number of information contacts in which a staff member involves information sources to the number of persons in the library's Combined Service Area. It is the number of reference transactions per year divided by the total population served by the library. The measure indicates the average number of times a resident of the service area received staff assistance in using information sources available or accessible through the library.
Total FTE Staff per 1,000 Population FTE Staff (FTE Librarians) x 1,000 Combined Population	This input measure relates information about Staff to Population Served expressed in a decimal. One full time equivalent (FTE) is one paid employee working 40 hours per week. Examples: 40 hours per week / 40 hours = 1 FTE 20 hours per week / 40 hours = .5 FTE

REPRODUCTION RELEASE

(Specific Document)

I. DOCUMENT IDENTIFICATION:

Title: 1998 Idaho Public Library Statistics and Library Directory	
Author(s): Idaho State Library / Frank Nelson	
Corporate Source: Idaho State Library	Publication Date: August 1999

II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, *Resources in Education* (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic media, and sold through the ERIC Document Reproduction Service (EDRS). Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following three options and sign at the bottom of the page.

The sample sticker shown below will be affixed to all Level 1 documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL HAS BEEN GRANTED BY

Sample

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

1

Level 1

XX

Check here for Level 1 release, permitting reproduction and dissemination in microfiche or other ERIC archival media (e.g., electronic) *and* paper copy.

The sample sticker shown below will be affixed to all Level 2A documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN MICROFICHE, AND IN ELECTRONIC MEDIA FOR ERIC COLLECTION SUBSCRIBERS ONLY, HAS BEEN GRANTED BY

Sample

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

2A

Level 2A

Check here for Level 2A release, permitting reproduction and dissemination in microfiche and in electronic media for ERIC archival collection subscribers only

The sample sticker shown below will be affixed to all Level 2B documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN MICROFICHE ONLY HAS BEEN GRANTED BY

Sample

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

2B

Level 2B

Check here for Level 2B release, permitting reproduction and dissemination in microfiche only

Documents will be processed as indicated provided reproduction quality permits.
If permission to reproduce is granted, but no box is checked, documents will be processed at Level 1.

I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce and disseminate this document as indicated above. Reproduction from the ERIC microfiche or electronic media by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries.

III. DOCUMENT AVAILABILITY INFORMATION (FROM NON-ERIC SOURCE):

If permission to reproduce is not granted to ERIC, *or*, if you wish ERIC to cite the availability of the document from another source, please provide the following information regarding the availability of the document. (ERIC will not announce a document unless it is publicly available, and a dependable source can be specified. Contributors should also be aware that ERIC selection criteria are significantly more stringent for documents that cannot be made available through EDRS.)

Publisher/Distributor:
